

Planning Range Chart

Standard / Advanced / Premium replacement ranges

Use this chart as a practical planning guide when comparing HVAC replacement options.

These are planning ranges, not firm quotes. Final pricing depends on the actual home, scope, and comfort goals.

System Level	Planning Range	Best Fit	Common Features / Options
Standard Replacement	\$10,000-\$18,000	Reliable replacement with professional installation.	Traditional replacement, proper setup, safety checks, thermostat setup, warranty registration.
Advanced Comfort System	\$18,000-\$24,000	Better comfort, quieter operation, improved efficiency, and better controls.	Higher efficiency, better airflow, enhanced comfort features, upgraded thermostat/control options.
Premium Comfort System	\$24,000-\$28,000+	Highest comfort, humidity control, air quality, and system performance.	Variable-capacity equipment, zoning, whole-house dehumidifier/humidifier, advanced filtration or air quality, smart controls.

Large homes, multiple systems, major ductwork changes, or highly customized comfort designs can exceed these ranges.
